

AL6000 Professional Breathalyser

Product Images

Description

The AL6000 PRO Digital Breathalyser combines leading technology with quality and simplicity. This Digital Breathalyser can be operated in **dual-mode**: Normal mode to measure specific blood alcohol concentration or activate the second mode to use it as an alcohol responder (share between multiple people) to test the presence of alcohol.

Andatech PRO Digital Breathalyser Features:

- Australian Standard AS3547 certified.
- Semiconductor Sensor.
- Provides a highly accurate % BAC reading.
- Reading range: 0.00 to 0.40% BAC.

- Dual-mode: fast and normal.
- Perfect for professional and personal use.
- Leather pouch and **5 mouthpieces included**.

We recommend purchasing the pack of 50 additional mouthpieces for continued use.
