

# Carborundum Flat Plate

## Product Images

## Description

---

Where the use of Bronson Safety stair nosing is not practical, such as on the rungs of ladders or when the priority is a performance at minimal cost, there is now a complete range of simple but effective carborundum modified angled and flat plates. Available in a multitude of sizes and profiles, Bronson can supply a purpose built solution for every application. Our carborundum modified angled and flat plates are P5/R13 rated for optimum safety and exceed the requirements of the Australian Standards AS/NZ 4586:2013. All plates are UV stabilised and epoxy coated to stand up to a wide range of harsh Australian conditions. Our plates come complete with screws and are pre-drilled so they are ready to be installed immediately. Available in yellow, black and grey.

- Profiled angles to suit specific applications

- Carborundum plates rated P5/R13 Exceeds AS/NZ 4586:2013
