

Latch Tight™ Group Lock Box

Product Images

Description

Secure each lockout point on a piece of equipment with a single padlock. Place the keys in the group lock and then each authorized employee places their personal padlock on the lock box. When work is complete, each employee takes their personal padlock off the lock box, freeing the keys inside. Keys cannot be accessed until the last employee removes their padlock. All Master Lock group lock boxes feature an exclusive, Latch Tight locking mechanism that prevents keys from being accessed until the last employee removes their padlock. Durable powder coated finish with stainless steel handle.
