

Rotating Gate Valve Lockout (203mm-330mm)

Product Images

Description

Tough lightweight, dielectric Xenoy thermoplastic bodies withstand chemicals; perform effectively in extreme conditions temperature range (-46°C to 177°C). Surrounds the valve operating handle to protect against accidental valve opening. Unique, rotating design allows for easier installation in confined space applications. Centre knockout can be removed for rising stem gate valves. Each size rotates into itself and nests within the next larger size to save space in storage. Multiple workers can apply their safety padlocks. Complete with high-visibility permanent safety labels (English, French & Spanish) that can be written-on to identify the responsible person, then erased for the next job.
