

Rack Armour

Product Images

Description

Rack Armour is the simple, superior solution to rack damage caused by forklifts and other warehouse operations. Rack Armour incorporates a patented design that provides ongoing protection and outperforms all over conventional racking protection.

- Tough polymer outer shell can withstand significant impact while maintaining consistent persistence of shape. Inner shock diffusing material acts to spread the impact over the entire unit, therefore significantly reducing damage.
- Slimline design ensures minimal intrusion into pallet space. Operates in extreme temperatures (hot and cold) Cold Store safe.
- No fixings or bolts required. Exceeds AS4084 requirements
