

Mobile Barrier

Product Images

Description

This portable barrier is simple to use. Lightweight design allows for easy expansion and retraction where required.

Product Notes:

- Can be used in both indoor and outdoor applications.
- Set this barrier in either a straight, curved or circular position.
- Non-conductive polyethylene construction provides additional safety when power tools or other electrical sources are present.
- Expands to 4 metres.
- Weighs only 16.2kgs.
- 910mm high with 16 articulating panels.
- 4 locking straps secure the barrier closed.

- 2 wheels make it easy to move around.
