

# Explosive 1 Hazchem Sign

## Product Images

## Description

---

Indicates the storage and containment of Class 1 Explosive goods within a facility, vehicle or container etc.

- Class 1 explosives are any material or item that has the ability to rapidly conflagrate or detonate as a consequence of chemical reaction.
- Examples: Ammunition, fireworks, flares and detonators.
- Read Chapter 2.1 of the Australian Dangerous Goods Code for more information (latest edition - 7.6) – [available here](#).
- Recognisable by the orange background with black wording, exploding bomb symbol and the number '1'.
- Complies to all WHS regulations and Australian Standard AS1216-2006.
- Hazchem signs are required to be prominently displayed on any workplace or vehicle etc. that stores the specific item or material over a certain quantity.
- During an emergency situation, this sign/label will allow emergency services to identify any chemicals present.
- It is important as a business to correctly label all relevant items or chemicals using the appropriate Hazchem Signage.
- Available in a large range of materials and sizes to suit any application.

All Bronson Safety Hazchem signage meets the requirements of Australian Government Legislation.
