

Flammable Liquid 3 Hazchem Sign

Product Images

Description

Indicates the storage or containment of Class 3 Flammable Liquids within a facility, vehicle or container etc.

- Class 3 Flammable Liquids are those that give off a flammable vapour when exposed to certain temperatures above the flashpoint.
- Chemical Examples: Turpentine, Petrol, Diesel, and Kerosene.
- Application Example: Commonly used on warehouse forklift cylinders.
- Read Chapter 2.3 of the Australian Dangerous Goods Code for more information (latest edition - 7.6) – [available here](#).
- Recognisable by a red background with black wording, flame symbol and the number '3'.
- Sign complies with ADG, WHS Regulations and Australian Standard AS1216-2006.
- Available in a large range of materials and sizes to suit any application.
- Hazchem signs are required at any workplace that stores hazardous chemicals over a certain quantity.
- During an emergency situation, this sign will allow emergency services to identify any chemicals present.
- It is important as a business to correctly label all hazardous chemicals using the appropriate Hazchem Signage.

All Bronson Safety Hazchem signage meets the requirements of Australian Government Legislation.
