

Spontaneously Combustible 4 Hazchem Sign

Product Images

Description

Indicates the storage or containment of Class 4 Spontaneously Combustible Substances within a facility, vehicle or container etc.

- Class 4, division 4.2 Spontaneously Combustible substances are those that are liable to heating and spontaneously catching on fire under certain conditions.
- Examples: Aluminium alkyls, and white phosphorus.
- Read Chapter 2.4.3 of the Australian Dangerous Goods Code for more information (latest edition - 7.6) – [available here](#).
- Recognisable by a red and white split background with black wording, flame symbol and the number '4'.
- Sign complies with ADG, WHS Regulations and Australian Standard AS1216-2006.
- Available in a large range of materials and sizes to suit any application.
- Hazchem signs are required at any workplace that stores or transport hazardous chemicals over a certain quantity.
- During an emergency situation, this sign will allow emergency services to identify any chemicals present.
- It is important as a business to correctly label all hazardous chemicals using the appropriate Hazchem Signage.

All Bronson Safety Hazchem signage meets the requirements of Australian Government Legislation.
