

Dangerous When Wet 4 Hazchem Sign

Product Images

Description

Indicates the storage or containment of Class 4 Dangerous When Wet substances within a facility, vehicle or container etc.

- Class 4, Division 4.3 Dangerous When Wet materials are those that, on contact with water, are liable to become spontaneously flammable or exude flammable or toxic gas.
- Examples: Aluminium phosphide, sodium, and zinc particles.
- Read Chapter 2.4 of the Australian Dangerous Goods Code for more information (latest edition - 7.6) – [available here](#).
- Features a blue background with black wording, flame symbol and number '4'.
- This sign is available in a large range of materials and sizes.
- Complies with Australia's WHS regulations and Australian Standard AS 1216–2006.
- Allows quick designation and identification of hazardous materials in a facility, vehicle or storage container.
- Designed to alert emergency services to the types of chemicals present.
- Hazchem signs are required to be prominently displayed on any workplace or vehicle etc. that stores the specific item or material over a certain quantity.
- It is important as a business to correctly label all hazardous chemicals using the appropriate Hazchem Signage.

Bronson Safety Hazchem signage meets the requirements of Australian Government Legislation.
