

# Toxic 6 Hazchem Sign

## Product Images

## Description

---

Indicates the storage or containment of Class 6 Toxic Substances within a facility, vehicle or container etc.

- Class 6, Division 6.1 Toxic Substances are solid or liquid substances that are likely to cause death, severe injury or harm to human health if inhaled, swallowed, or upon contact with skin.
- Examples: Formaldehyde, Cyanides, and Chloroform.
- Read Chapter 2.6 of the Australian Dangerous Goods Code for more information (latest edition - 7.6) – [available here](#).
- Recognisable by a white background with black wording, representative skull and crossbones symbol and the number '6'.
- Sign complies with ADG, WHS Regulations and Australian Standard AS1216-2006.
- Available in a large range of materials and sizes to suit any application.
- Hazchem signs are required at any workplace that stores or transport hazardous chemicals over a certain quantity.
- During an emergency situation, this sign will allow emergency services to identify any chemicals present.
- It is important as a business to correctly label all hazardous chemicals using the appropriate Hazchem Signage.

All Bronson Safety Hazchem signage meets the requirements of Australian Government Legislation.

- For more information on Class 6 Toxic Substances, [click here](#).
- For information on Hazchem labelling and signs in a workplace, read WorkSafe Australia's Model Code of Practice – [view here](#).
- For all other information, consult the Dangerous Goods Storage and Handling Regulations for your State or Territory – [click here](#).
