

Skipper™ Wall Receiver Clip

Product Images

Description

The receiver clips act as an endpoint for Skipper retractable barriers and can also support the Skipper waste and safety management accessories.

Skipper wall and receiver clips attach retracting barriers to any surface. Pull out the tape from any Skipper unit and slide it into the receiver clip. This will end the barrier without using additional Skipper units, cones or posts. Waste and safety management products such as recycle bins and PPE dispensers can be attached directly to the receiver clip. The wall version requires 4 x screws (not included).

Connects to:

- [Skipper™ 9m Retractable units](#)
- [Skipper™ Recycle Bin](#)
- [Skipper™ PPE Dispenser](#)

Dimensions: 80mm (L) x 100mm (H) x 23mm(W) Weight: 45g

The receiver clip is available in a magnetic version as well.
