

Skipper™ Wall Support Bracket

Product Images

Description

The Skipper wall support bracket is a practical accessory for the Skipper unit and is ideal for situations where using a cone or post is not appropriate.

The bracket can be screwed into place for permanent/semi-permanent use. Once the bracket is in the desired position, the Skipper unit snap-fits onto the bracket and locks into place.

The quick-release clip prevents the Skipper unit from detaching from the bracket and allows it to be quickly disconnected after use. The support brackets are ideal for logistics, warehousing, and facilities management.

Connects to:

- [Skipper™ 9m Retractable Barrier Units](#)
- [Skipper™ Barrier Dummy Unit \(without tape\)](#)
- [Skipper™ Recycle Bin](#)

Dimensions: 124mm (L) x 168mm (H)

The bracket is also available in a non-marking [magnetic version](#) that can be attached to vehicles, shelving, and other metal surfaces.
