

Bulldog™ Lab Spill Tray (15L)

Product Images

Description

This compact Benchtop Spill Tray is ideal for collecting leaks and spills from small beakers or containers. Makes the decanting of liquids a far safer and cleaner process.

- Compact design is ideal for lab benchtops, tables and other small working areas.
- 15-litre sump capacity provides adequate secondary containment for liquids handled in small quantities.
- High-visibility exterior that is resistant to a wide range of industrial liquids.
- Individual benchtop spill trays can be connected together with a handy interlocking function.
- The removable grate allows the tray to be cleaned quickly and easily.
- Units are nestable (can fit inside each other) for easy storage when required.
- Ideal for indoor applications but suitable for outdoors if required.
- Colour: High-visibility yellow tray with black grate.
- Manufactured using tough polyethylene construction.

- Load capacity: 41kg
- Weighs only 1.7kg
