

316 Stainless Steel Bollard 140mm - Surface Mount

Product Images

Description

Bronson Safety Stainless Steel Bollards are manufactured from 316 marine grade stainless steel. This provides a longer-lasting finish and minimises the risk of staining. It is designed for use in a variety of applications within shopping centres, car parks and facilities that require pedestrian and asset protection at architectural standards.

- Particularly recommended for coastal areas where weather and sea salts can damage conventional bollards.
- **Four-bolt surface mount fixing.**
- **Bolts Sold Separately - We recommend the A4468 Sleeve Anchor Bolts for concrete and the A4918 Hilti Anchor Bolts for bitumen applications.**
- Provides a time-efficient and cost-effective solution for installation.

- No core drilling or concreting required.
- Manufactured from marine grade 316 stainless steel.
- Polished with No. 4 mechanical finish.
- Machined-flat top cap.
- Height: 1200mm
- Diameter: 140mm
- Weight: 11kg
