

9V Stand Alone Emergency Alarm

Product Images

Description

This Stand Alone Emergency Alarm can be used where installation of a permanent emergency system is not required, practical or cost-effective.

Ideal for construction sites, temporary sites such as large marquees, or campsites.

- Unit is very fast to install and does not require wiring unless wiring is used to connect multiple units together.
- Up to 25 units can be connected together for larger sites, using only a 2 core wire cable.
- Size: W 180mm x D 120mm x H 300mm
- Push button activated.
- Includes an inbuilt strobe.
- 9V battery operated (battery not included)
