

Silt Curtain Type 1 Velcro Connectors

Product Images

Description

Silt Curtains are a suspended floating column that assist to control migrating sediment in water.

- Ideal applications: marine construction, bridge maintenance, aquatic site work and dredging.
- By disrupting the water flow, Silt Curtains allow suspended solids to settle to the bottom reducing stress to fragile aquatic systems.
- Silt Curtains are handmade in an Australian manufacturing facility.

Product Features:

- 100mm square PE Foam Floats.
- 400gsm UV stable PVC float chamber.
- 25mm seat belt webbing below the float as tensioner for the PVC float pocket.

- 270gsm non-woven needle-punched polypropylene geotextile filter skirt.
- 400gsm PVC ballast pocket containing 6mm galvanised chain reinforced to the skirt by 25mm webbing.
- Sections are connected end-to-end by Velcro and webbing loops.
