

Weed Boom Type 1 Velcro Connectors

Product Images

Description

Noxious weeds and aquatic flora migration have been a growing problem in Australian waterways. Weed Booms are designed specifically to combat surface weed and flora migration throughout stormwater channels, rivers, creeks and dams.

- 450mm overall depth (150mm freeboard, 300mm skirt).
- Choose lengths based on the size of the application.
- 370gsm HDPE Shade Cloth Skirt.
- 100mm PE Foam Floats.
- 6mm galvanised chain
- 400gsm PVC float chamber and ballast pocket.
- Sections are connected end-to-end by Velcro

Note: Customised depths and lengths are available – please contact our friendly team on 1300 095 701 to inquire.
