

Electro Weld Mats

Product Images

Description

Electro-Weld is a spark resistant, non-conductive mat used to protect people against shocks from electricity and withstand welding dross.

- Constructed from durable natural rubber.
- Ribbed surface provides excellent traction.
- Rated dielectric strength up to 30,000 volts (VAC)
- Protects workers against electric current.

- Withstands molten metal and sparks up to 1500 degrees celcius for less than 3 seconds.
- Tested to, and conforms to Australia Standards AS/NZS 2978:1995.
- Tested to, and conforms to International Standards ASTM D-178 Type II Class 2.
