

# White Class 1W Ultra High Intensity Reflective Tapes

## Product Images

## Description

---

Bronson Safety's Class 1 and Class 1W Reflective Tapes offer the highest grade of reflectivity and visibility available on the market. Suitable for various applications, including vehicle markings, traffic control signage or for general workplace safety, Class 1 and Class 1W Reflective Tapes are up to 3 times more reflective than Engineer Grade Class 2 tapes. Weatherproof and durable, they are designed to last for up to 10 years in all indoor and outdoor environments.

- Class 1/Class 1W – Complies with AS/NZS 1906.1:1993.
- Self-adhesive vinyl sticks to any smooth, dry, dirt-free area and conforms to curved or angled surfaces.
- High visibility for night time and low light conditions.
- Up to 3 times brighter than Engineer-Grade Class 2 Reflective tapes.
- Suitable for bollards, barricades, machinery and hazard areas which require added visibility.
