

Orange Bulldog™ Traffic Cones

Product Images

Description

These hi-vis Bulldog™ Traffic Cones are specifically designed for day and night highways and council road works as well as for carparks, warehouses, schools and mine sites. These cones will not fade in harsh Australian conditions.

- **Flexible UV stabilised premium quality PVC construction** ensure industry leading durability and toughness.
- All Bulldog Traffic Cones **comply with Australian Standard AS 1742.3-C 2002 Section 3.9.1.**
- Cones include unique **levelling feet** for additional stability on uneven surfaces.
- 300mm & 450mm traffic cones are suitable for low speed urban and rural roads.
- 700mm & 900mm traffic cones are suitable for highways and other applications.

- Suitable for day or night use - For night time applications, cones must be equipped with reflective sleeves.
- Reflective Sleeves are **Premium Orafol (Reflexite) Reflective Cone Sleeves** which are transport compliant and exceed your ordinary Class 1 reflective material. Orafol is the world leader in retro-reflective materials. Their traffic cone sleeves have been approved by every state road authority in Australia.
- Reflective Sleeves Available: White, Fluoro Green, Red or Blue.
