

Traffic Lane Separator Flexible Chevron Blade (Road Shoulder)

Product Images

Description

Bronson Safety Traffic Lane Separators are used to effectively separate vehicles from changing one lane into another or entering into a restricted area.

The Flexible Chevron Blade can be added to the Traffic Lane Separators to direct traffic flow through roadworks or your facility or for increased visibility in low light and night-time conditions.

- Manufactured using compliant highly reflective 3M Class 1W material.
- 1 x Delineator Post per module
- Flexible Chevron Blade: 150(W) x 750(H)mm

NOTE: Flexible Chevron Blades can only be mounted into the [Traffic Lane Separator](#) modules sold separately.
