

Bump Cap

Product Images

Description

These Bump caps protect against skull lacerations and minimise the possibility of lateral impacts.

- Ideal application: Roof contractors, mechanics, horticultural arenas, agricultural arenas, road workers, painters and scaffolders.
- Extremely comfortable to wear and modern sport design.
- Tested and approved compliance to EN812-Industrial Bump Caps.
- Wear when hard hat protection is not required but the head protection is warranted.
- Fully ventilated with 8 ports.
- Includes an easily removable and replaceable ABS Shell.
- The shell features quality dual-layer EVA foam padding on the skull and exterior for light but efficient protection.
- The exterior is manufactured from 100% cotton.
- Medium 70mm peak length.

Note: Bump caps are intended to protect against minor bumps and scrapes caused by low ceilings or hanging objects in the workplace. They are not an AS/NZS Occupational Protective Helmet and do not protect against falling objects or major impacts.
