

Traffic Cone Flashing Lights

Product Images

Description

Create extra visibility and safety in your work zone or facility by adding the Traffic Cone Flashing Light to your traffic cones. The flashing light fits snugly inside the top of most standard traffic cones adding additional visibility in low-light conditions. The light has a steady flash function providing adequate warning of potential hazards or of upcoming traffic lane redirection.

- Suitable for all 450mm, 700mm and 900mm Bulldog™ Traffic Cones. Also suits most standard traffic

cones and 4-sided cones.

- Available in two colours. Amber or Red.
- **In-built photo sensitivity automatically detects dimming light and will commence flashing as a warning light in low light conditions. Light will switch itself off in bright conditions saving battery usage.**
- Powered by 2 x D size batteries (not included). Twist to turn on and off.
- NOTE: These are not an on/off light like a torch, the light comes on automatically once conditions are dark and turns off once bright again. Making them perfect for hassle free deployment no needing to switch them on and off.
