

Ground Socket Lane Flex Pro Removable Flexible Bollard

Product Images

Description

Lane-Flex® Pro is a premium polyurethane removable bollard designed to enhance the safe and uninterrupted flow of traffic in positions where the traffic flow direction is manually changed.

Lane-Flex® Pro is suitable for peak and off-peak traffic direction changes, and can also be used to define highway crossovers or 'no-go' buffer zones.

The removable design is safe for emergency or law enforcement vehicles to drive over when required and will rebound to its original position after impact.

- Designed for highway crossovers, traffic calming and variable lane applications. eg. toll booths and events.
- Available in two sizes: 450mm and 750mm length x 100mm dia.

- Manufactured using premium grade UV stabilised long lasting polyurethane.
- High-quality 3M Class 1A delineation for increased low light visibility.
- **Ground Socket required for installation sold separately.**
- **Made in Australia**
