Horizontal Spray

Horizontal Spray

Description

Dy-Mark Mine Marking Paint is a marking out mine paint specially formulated **for use in above and below ground mining areas.**

Mine Marking utilizes a 360 degree valve with two convenient nozzle options for “vertical” upright & inverted spray or “horizontal” spray applications.

“Horizontal” features a standard paint nozzle (for where the main application is side walls). “Vertical” is designed for the marking of ceilings and floors.

Applications include marking out ore zones in grading control, pit walls and server grid layouts.

For high ceilings and hard to reach areas, use of the [Mine Marking Extension Handle](#) is recommended (suitable for use with can both options).

Features & Benefits

- Specially formulated **for use in above and below ground mining areas.** (not recommended for underground coal mines - use [Mine Marking Paint Non-Flammable](#)).
- High opacity, high quality, true colour pigment loading. Bright, highly visible marks on dark surfaces.
- **Two nozzle options are available for “vertical” upright & inverted spray or “horizontal” spray application.**
- 360° degree valve for any direction spray.
- Applications include marking out ore zones in grading control, pit walls and survey grid layouts.
- Vertical spray is suitable for use with the [Mine Marking Extension Handle](#), available separately.
