Description

Dy-Mark Mine Marking Paint is a Non-Flammable marking out mine paint specially formulated **for use in below ground mining areas and other fire sensitive situations.**

Mine Marking Non-Flammable utilizes a 360 degree valve and has two convenient nozzle options for “vertical” upright & inverted spray or “horizontal” spray applications.

“Horizontal” features a standard paint nozzle (for where the main application is side walls). “Vertical” is designed for the marking of ceilings and floors.

For high ceilings and hard to reach areas, use of the [Mine Marking Extension Handle](#) is recommended (suitable for use with can both options).

Features & Benefits

- Specially formulated for use in below ground mining areas and other fire sensitive situations.
- High opacity, high quality, true colour pigment loading. Bright, highly visible marks on dark surfaces.
- Two nozzle options are available for “vertical” upright & inverted spray or “horizontal” spray application.
- 360° degree valve for any direction spray.
- Applications include marking out ore zones in grading control, pit walls and survey grid layouts.
- Vertical spray is suitable for use with the [Mine Marking Extension Handle](#), available separately.
