3M™ Conspicuity Vehicle Marking Tape Fluoro Yellow

Product Images

Description

Keep your fleet safer with 3M™ Diamond Grade™ Reflective Technology.

3M™ 983-23 Diamond Grade Conspicuity Vehicle Marking Tapes are highly retroreflective and are designed to delineate the sides and rear of vehicles for enhanced safety and visibility.

The FACTS!

The risk of an accident between a truck and a car is 30 times greater when a truck does not have high visibility vehicle markings.
A truck with outline reflective markings is recognised earlier than an unmarked truck because they help to define the total size of the truck to other road users. This gives other drivers more time to manoeuvre safely in traffic.

- Suitable for Trucks, Trailers, Emergency Vehicles, Buses, Mining Vehicles and Trains.
- Available in Fluoro Yellow, Red, White and Yellow ensuring maximum reflectivity and superior daytime visibility.
- All 3M™ vehicle marking tapes have been independently tested and comply to ECE104, AS/NZS 1906.1 and Australian Design Rule 13/00, 2005 (Appendix A - UNECE R48/03).
- Delivers outstanding vehicle visibility, alerting more road users faster and earlier
- Strong and durable adhesive backed tape for easy application to flat, rigid or smooth surfaces.
- Tape edges are pre-sealed to prevent dirt and water penetration.

Additional Information

Brand	3M™
Tape Type	Reflective
Tape Colour	Fluoro Yellow
Tape Width	50mm

Product Options

Tape Length:	3m
	15m
