

Skipper™ Magnetic Support Bracket

Product Images

Description

The Skipper magnetic support brackets are hugely practical accessories for the Skipper unit, and are ideal for situations where using a cone or post is not appropriate.

The bracket is a non-marking magnetic version that can be attached to vehicles, shelving, and other metal surfaces. Once the bracket is in the desired position, the Skipper unit snaps onto it and locks into place.

The quick-release clip prevents the Skipper unit from detaching from the bracket and allows it to be quickly disconnected after use. The support brackets are ideal for logistics, warehousing, and facilities management.

Connects to:

- [Skipper™ 9m Retractable Barriers](#)

- [Skipper™ Barrier Dummy Unit](#)

Dimensions: 124mm (L) x 168mm (H) x 133mm(W)

The bracket is also available in a [wall version](#) which can be screwed in place for permanent/semi-permanent use.
