

# Skipper™ Unicart Trolley

## Product Images

## Description

The Skipper™ Unicart Trolley is distinctive, beautiful, and contains a wealth of innovation. It is ideally suited for housing the Skipper Barrier System. The Unicart is easy to maneuver thanks to its large ergonomically designed handle, brakes, and suspension on the rear wheels. The suspension adds a huge benefit, adding to the trolley's control and improving and dampening the sound when it is manoeuvred across multiple surfaces.

Beautifully designed yet robust, rugged and hard-working.

Whether it's a hotel, office, mine maintenance, railway yard or construction site, the multi-functional Skipper Unicart connects to your environment perfectly.
