

Road Train Sign 36.5m Long

Product Images

Description

Starting 1 July 2024, Western Australia will be the first State to introduce new pictorial length signage on road trains, which aim to enhance road safety by providing a clearer visual of the length of the vehicle in front of them, before attempting to overtake.

The new signage are to be displayed on the rear of restricted access vehicles, including road trains and other heavy vehicles.

The signs show the number of trailers and the total length of the vehicle, depicted with an equivalent number of car lengths.

Main Roads WA Signage Requirements: Standard Road Train & B-double Signage

Prime mover and trailer combinations ≤ 2.5 metres in width and ≤ 22 metres in length do not require any signage.

B-doubles and Road Trains > 22 metres in length and ≤ 27.5 metres in length, must display the “**27.5m Long**” sign on the rear of the combination.

Road Trains > 27.5 metres in length and ≤ 36.5 metres in length, must display the “**36.5m Long**” sign on the rear of the combination.

Road Trains > 36.5 metres in length and ≤ 53.5 metres in length, must display the “**53.5m Long**” sign on the rear of the combination.

Material: Metal Class 2 Reflective

Dimensions: 1020mm x 250mm
