

Advantage 200 LS Half Face Respirator (Large)

Product Images

Description

The Advantage 200 LS Half Face Respirator is a comfortable, efficient and economic half mask. It is ideal for applications where workers are exposed to various hazards such as high concentrations of fumes, mists and gases.

- Patented MultiFlex system offers maximum protection and high wearing comfort.
- The soft, pliable combination of rubber and plastic provides a customised and pressure-free fit, instantly conforming to the wearer's unique facial characteristics.
- Has a complete and exclusive filter programme to protect against harmful particles and/or gases.
- Facepiece is lighter and softer which gives more comfort and stability than ever.
- AnthroCurve™ Sealing Surface instantly conforms to each wearer's unique facial characteristics.
- The unmatched fit and comfort start with a soft, pliable combination of rubber and plastic that provide a virtually customised fit.
- Delivers exceptional stability, so the respirator will not collapse during wear.
- Features bayonet style design respirator filter connection for quick mounting.
- Compliant with and certified to AS/NZS 1716:2012.
- Size: Large

The Advantage 200 LS Half Face Respirator is also available in a [medium](#) size.

*Mask ONLY. Advantage Respirator Filters sold separately.
