

Bike Rack Cantilevered Multi-bay (4 Bay)

Product Images

Description

The Cantilevered Multi-Bay Rack simple to install, secure and space-efficient.

- The design allows both the front wheel and frame to be locked for maximum security.
- The cantilever ensures four bikes can easily park in the smallest possible space, without handle-bar or pedal conflict.
- Engineered to withstand heavy use.
- Easy to install on most ground surfaces, including concrete, brick and bitumen etc.
- Suitable for public and private areas.
- Designed in accordance with Aus-roads recommendation to allow easy locking.

*Supplied flat packed. Minor Assembly Required.

*This product is considered extremely bulky – Additional freight charges may apply for customers in regional areas or who require delivery by tailgate truck.
