

Bike Rack Wall Mounted - Base Plate (Powder Coated)

Product Images

Description

This Innovative Wall Bike Rack System provides maximum storage density in areas requiring high-efficiency storage, such as in apartment basements.

- One bike can be parked.
- Engineered from a single piece of tube, providing maximum strength with delicately turned radius bends.
- Brackets are designed to ensure high holding strength as well as rigidity so that bike storage is always secure and safe.
- Can be mounted at 450mm intervals.
- Custom framing can be created to support these racks if no suitable wall is available.
- Easy to install on most wall surfaces.

- Suitable for public and private areas.

*This product is considered extremely bulky – Additional freight charges may apply for customers in regional areas or who require delivery by tailgate truck.
