

Lightweight Pigtail Post (Pack of 10)

Product Images

Description

These Lightweight Pigtail Posts are a great temporary fencing solution that is quick and easy to install. Use with rope or bunting - secure one end and simply 'step in' the post into the ground, then loop through the unique pigtails until your desired length fence is complete.

- Ideal for soft soils and grass locations, eg. school ovals, sporting fields, landscaping and rejuvenation areas or other locations that require cordoning off.
- White plastic insulation means they are highly visible and can be used in farming for strip grazing and electric fencing.
- Lightweight 6mm spring steel construction.
- Dimensions: 1210mm overall length. (**1010mm above ground, 200mm below ground**).
- Supplied in a pack of 10 posts.
- **NOTE: Posts must be used with rope or bunting to create a fence. (rope and bunting available separately)**
- Use our new [Heavy Duty Steel Corner Posts](#) with your Pigtail Posts. They are perfect for endpoints and will allow you to keep good tension on the bunting or rope.
