

Flexi360 Guide Post System (In-ground)

Product Images

Description

Flexi360 Guide Post System with an In-ground Drivable Anchor is the World's Premium Guide Post System.

- 1000mm long **white** HDPE post.
- Mounted on patented 350mm drivable anchor and flexible base.
- 360-degree flexibility allows use in high, medium and low impact zones.

- Exceeds Australian Standards and is approved and accepted in all States and Territories in Australia.
- Can be used in rural, regional or urban environments.
- Lightweight and **easy to install** using the [Flexi360 Guide Post Manual Install Driver & Clamping Tool](#).
- Delineator width: 50mm.
- Delineator length: Choose between 100mm (5k) or 200mm (10k).
- Delineators class: Retroreflective Class 1A.
- **Red/White delineators:** Red on one side of the post and White on the other side, as per Australian Standard specifications.
- **Amber delineators:** Amber on front side of the post only.
- **Made in Australia**

*100mm (5k) and 200mm (10k) delineator size options are available to suit the State or Territory of installation and/or the intended use, road type or location.
