

Slip Resistant Agent

Product Images

Description

- A plastic, non-settling agent that can be added to most low-gloss paint coatings to increase slip resistance.
- Great to use on stairs, paths, ramps, driveways and around swimming pools.
- Not for use with high-gloss paints. Uniform particle size gives a professional finish to all coatings.
- Can be used in clear satin varnishes and paints to increase traction in the coatings.
- Coverage Notes: 50g per litre of paint and 15g per litre in clear paints.
