

Dura-Post Flexible Sign Posts

Product Images

Description

These flexible sign posts are designed and manufactured for situations where regulatory or directional signage may be positioned in an impact zone.

- Made of HSEP (High Strength Engineered Polymer) post fitted to the Dura-Post flexible joint.
- This combination of a strong polymer post and flexible joint gives the system unrivalled strength and flexibility.
- Ideal for areas where standard signposts will be bent, dented or destroyed by impacts from vehicles.
- Post Dimensions: Length 1000 x Diameter 60mm.
- **Installation:** The Dura-Post Flexible Sign Post can be installed with the following options sold separately;
 - Surface Mounted:** Using the [A1613 Surface Mount Plate](#) OR
 - Ground Socket:** Using the [A1614 T-Pipe Sleeve](#) for insertion into a Ground Socket.
- Add signage using our 60mm Signage Brackets.

- Made in Australia
