

Stainless Steel Banding Buckle

Product Images

Description

Stainless Steel banding is used with buckles & brackets to fix your signs onto small or large diameter posts or structures. Stainless steel band fastening solutions are used for a vast majority of industries worldwide. With solutions tailored to meet the specific needs of transportation, energy, industrial, marine and government markets, the buckle and banding solution is also an industry choice when it comes to signage installation.

Finding the right Stainless Steel Strapping System for you is easy following the below steps.

Step 1: Choose your designed stainless steel Banding Strap width, 13mm or 19mm.

Step 2: Based on your banding strap width choice, choose the required 13mm or 19mm Banding Buckle. (1 x Banding Buckle required per strap)

Step 3: Choose your required 13mm or 19mm Banding Bracket. (1 x Banding Bracket required per sign hole)

Step 4: Use the specially designed Banding Tool to tighten your system together. (Banding Tool suits both 13mm and 19mm strap)
