

Hi-Vis Compliance Wheel Stop

Product Images

Description

Bronson Safety is proud to release our next generation wheel stop, that is lighter, brighter and easier to install than other alternatives.

- Fully compliant to AS/NZS 2890.1:2004 and made from environmentally friendly LLDPE.
- Designed to outperform and outlast conventional rubber wheel stops.
- We have even designed them with a clever sign recess, giving you the option to easily add a standard sign or your own custom worded message.

- High-Quality Linear Low-Density Polyethylene (LLDPE) material
- Solid colour and U.V. stabilised for harsh Australian Conditions.
- The rugged design structure includes reinforced bracing to withstand constant bumps and collisions.
- **Easy to install – one-man job.**
- Weighs ONLY: 4.5kg
- Dimensions: Length 1650mm x Width 150mm x Height 100mm
- 3 high-strength fixing points.
- **Bolts/fixings sold separately. We recommend the Sleeve Anchor Bolt (A4469) for concrete and Road Spike (A1543) for bitumen applications.**
- Moulded-in sign recess for standard and customised sign options
- **Parking identification made easy with Wheel Stop signage (available separately).**
- **Class 2 reflective signs are ideal for night or low light conditions (Custom text also available).**
- **We recommend the Sign Mounting Screw Sets of 4 or 40 (A5409 or A5410) to attach the Wheel Stop Signs.**
