

Oxford Plastics 12/8 Trench Cover

Product Images

Description

Oxford Plastics are global leaders in the design and manufacture of high-performance worksite safety products. All items are designed and manufactured in the UK by inhouse chemists and engineers to ensure outstanding quality and performance.

The 12/8 Safe Cover by Oxford Plastics is a versatile, rigid and lightweight trench cover that is suitable for pedestrians and 2 tonnes vehicles over a 700mm trench. Safe, simple & strong with a glass reinforced composite cover featuring ribbed framework for added strength. The anti-slip surface is safe and secure for pedestrians, and chamfered edges prevent trips. The 12/8 Safe Cover can be bolted down.

- Anti-slip and anti-trip.
- Compliant with DETR 'Safety at Street works and Road works Code of Practice.
- Suitable for the distributed weight of a 2 tonnes vehicle.
- Colour and logo customisation available.
- Lighter & durable alternative to steel plates.
- Passed load testing with a 250mm pad for distributed 2 tonnes (500kg) load.
- Designed and manufactured in the UK to outperform and outlast cheaper imitations.
- Dimensions: Length 1200mm x Width 800mm x Height 30mm
- Weight: 13kg
