

Stackable Water Filled Barrier

Product Images

Description

Whether your requirement is to redirect, delineate or separate pedestrian and slow vehicle traffic, these unique Stackable Water Filled Barriers are a perfect choice. Manufactured using premium polyethylene material they are UV resistant making them ideal for both indoor and outdoor use in the harsh Australian sun.

This unique stackable design helps **reduce transport and storage costs**, while the new and improved lightweight system makes them safer and easier to deploy on site. You can also link these barriers together using the interlocking connectors, supplied with the base product.

- Unique stackable design helps reduce transport and storage costs.
- Lightweight making them safer and time efficient to deploy on site can easily deploy a run of barriers on site from the back of a work vehicle.
- Made from durable UV resistant polyethylene material.
- Available in both Orange and White.
- Dimensions (mm): 1100(Length) x 600(Height) x 100(Top Width)/360(Bottom Width)
- Weight empty: 7.0kg. Weight filled: 50kg.
